

The **Endo** Educational  
Organization of Canada

## Resource Library: BRI – Reproductive Immunology & Endometriosis Surgical Center

"Our practice is a specialty fertility clinic treating patients internationally. We treat all causes of recurrent pregnancy loss and perform all necessary in vitro fertilization (IVF) and intrauterine inseminations (IUI) procedures. We also continue to care for and monitor our patients through their entire pregnancy. We have the experience, resources, and a passion to help patients prevent miscarriage." - BRI Website

We support this resource because of the advocacy efforts of Dr. Vidali, BRI's reproductive surgeon & reproductive endocrinologist, surrounding endometriosis (personally and with the Endometriosis Summit) and the variety of topics discussed and addressed within BRI's website. These topics include (but are not limited too) endometriosis, adenomyosis, fertility, PCOS, auto immune conditions etc. After listening to Dr. Vidali speak about reproductive immunology during a conference, our organization was astounded by the high-level education that BRI & Dr. Vidali bring to the table. Dr. Vidali is paving the way at preventing miscarriages and improving patient's quality of life. You can find BRI & Dr. Vidali on Facebook, Instagram and the web.
