

The **Endo** Educational
Organization of Canada

Resource Library: Endo Invisible

"Founded in 2016, Endo Invisible's mission is threefold: raise the profile of, educate the world about, and help fund surgery for, endometriosis. Skilled excision is considered the gold standard in successful treatment of endometriosis, however locating these experts can be difficult and traveling to them near impossible for many due to the financial constraints involved. We believe that offering equal access to this life-changing surgery can make our communities stronger: we can finish our studies. We can pursue careers. We can build families. Your donation allows individuals with endometriosis to get that much closer to living, not merely existing, and that is the ultimate gift." - Endo Invisible

We support this resource because founder Michelle has helped numerous patients access proper excision surgery from experienced endometriosis specialists. Changing endometriosis patients' lives is the focus and root of the organization. You can find more information about Endo Invisible on Facebook, Instagram and the web.
