Organization of Canada

## Resource Library: iCareBetter

“iCareBetter is an innovative platform dedicated to helping people with endometriosis find doctors who provide compassionate and skilled care. All Surgeons featured on iCareBetter are verified to specialize in the excision of endometriosis. All doctors listed on this directory have gone through a rigorous peer to peer review process. With iCareBetter, patients can ensure their voices are represented in the doctor search process. And they will be able to choose their surgeon based on specific case skills and needs, such as thoracic endometriosis, bowel or bladder involvement, diaphragmatic endometriosis, superficial to deep disease, endometriosis-related infertility and more.” -iCareBetter Website

**We support this resource because iCareBetter is paving the way by becoming the first platform to implement a globally accessible vetting process for excision surgeons. Furthermore, iCareBetter’s list of surgeons who pass the review process is completely transparent, so patients can feel empowered to choose a surgeon who is proven to perform excision effectively in the areas they need. You can find more information about their initiative and up-to-date information about reviewed surgeons by following iCareBetter on Instagram, Facebook and the web.**
