

The **Endo** Educational
Organization of Canada

Resource Library: Endometriosis Foundation of Canada

“The idea came to me in an airport, on the way home from an international endometriosis event. Seeing the lack of awareness, shortage of endometriosis specialists as well as research made the idea turn to action quickly. We are hoping to focus our visions on creating more generalized awareness. Hoping to aid in fellowship programs in order to gain more specialists for the disease; with the added hope to get resources into provinces that currently have none, as well aid in research to hopefully one day find a cure. “ – Alexandra Camara, Founder of the Endometriosis Foundation of Canada

We support this resource because the Endometriosis Foundation of Canada is working towards furthering awareness & funding for endometriosis research in Canada. We look forward to seeing what the EFC will do in the near future. You can find more information about the Endometriosis Foundation of Canada on Facebook, Instagram and the web.
